The Top Products awards identify leading technology products for construction, and are selected based on usefulness to the construction industry and customer growth rate. See all the Top Products at www.constructech.com.

Featured Project: Tien Restaurant

(Biloxi, MS) - IP Casino Resort & Spa, in the midst of an ongoing renovation and expansion valued at over \$100 million, turned to Tom Nebel Productions to help them publicize the opening of Tien, a dramatic 10,500 square foot Asian restaurant.

"We wanted to show progress on the restaurant, but build suspense by not showing too much," says Tom Nebel, president of the company.

Two iBEAM Time-Lapse Pro cameras were used to capture the three months of construction.

Although the cameras were installed to provide footage for marketing purposes, the casino's Planning, Analysis, Construction & Development division was able to log into the cameras' web site to stay informed of the progress of construction.

"The entire process was absolutely seamless -- from my first phone call to iBEAM Systems to installing the cameras," notes Mr. Nebel.
